Computer package electrical design — Davidson — 349
Conduction-cooled module — Oktay — 55
Conduction cooling for LSI — Chu — 45
LSI package wireability — Koch — 328
Printed circuit technologies for the 3081 — Seraphim — 37
Quality and reliability assurance systems — Melan — 613
Semiconductor manufacturing technology — Carre — 528
Single chip module — Bendz — 278
Thermal conduction module — Blodgett — 30
Thin-film module — Ho — 286
VLSI bipolar metallization design — Fried — 362
Yield management — Stapper — 532
3081 system development and technology — Pittler — 2

Lasers and their applications
Contact lithography with excimer lasers — Jain — 151
Electrophotography — Tam — 186
High-resolution LC projection displays — Dewey — 177
Holography in 3687 supermarket scanner — Dickson — 228
Image projection — Levenson — 160
Infrared holographic materials — Bräuchle — 217
Integrated optics and Raman scattering — Rabolt — 209
Laser-enhanced chemical etching — Chuang — 145
Laser-enhanced plating and etching — von Gutfeld — 136
Laser-induced arcing — Hodgson — 235
Modification of semiconductor devices — Kiang — 171
Multiple photochemical hole burning — Gutiérrez — 198

Lithography
Electron-beam proximity printing — Bohlen — 568
Feature size control — Frasch — 561
Laser-enhanced chemical etching — Chuang — 145
Laser-enhanced plating and etching — von Gutfeld — 136
Mechanism of chlorobenzene single-step liftoff — Halverson — 590
Metrology in mask manufacture — Rottmann — 553
Ultrafast high-resolution contact lithography — Jain — 151

Logic design and technology
Lead reduction among combinatorial logic circuits — Vilkelis — 342
VLSI microprocessor design considerations — Campbell — 454
3081 processor unit design — Gustafson — 12
3081 system development and technology — Pittler — 2

LSI chip design automation
Computer design verification — Smith — 106
Computer timing analysis — Hitchcock — 100
LSI package wireability — Koch — 328
VLSI design verification strategy — Tran — 475
VLSI microprocessor chip design — Mathews — 464
VLSI physical design verification — McCabe — 485

Manufacturing technology
Czochralski-grown silicon — Murgai — 546
Feature size control — Frasch — 561
Final logistics and product dispositioning — Burgess — 605
High-density board fabrication — Bupp — 306
Immersion wave soldering process — Getten — 379
Metrology in mask manufacture — Rottmann — 553
Optimization of plasma processing — Bergendahl — 580
Quality and reliability assurance systems — Melan — 613

Semiconductor manufacturing technology — Carre 528
Single-step liftoff — Collins 596
Yield management — Stapper 532

Materials
Czochralski-grown silicon — Murgai 546
Diazo-type resists — Collins 596
Diazo-type resists — Halverson 590
Indium-lead alloys for chip connections — Howard 372
New infrared holographic materials — Bräuchle 217
Printed circuit technology for the 3081 — Seraphim 37
Single chip module — Bendz 278
VLSI bipolar metallization — Fried 362

Mathematics (applied)
Image vectorization — Jimenez 724
Rectangular transforms for signal processor — Cooley 424
2D convolution and transform methods — Kriz 708

Mechanics and mechanisms
LSI circuit interconnection technology — Babuka 318
Mechanism of chlorobenzene liftoff — Halverson 590

Medical electronics
Backscatter and attenuation imaging — Farrell 746

Memory design and technology
Storage aspects of photochemical hole burning — Gutiérrez 198

Microcontrollers
Common chip for disk and diskette controllers — Dix 440

Microprocessor-based applications
Final logistics and product dispositioning — Burgess 605

Microprocessor-based system design
Implementation of mainframe processors — Agnew 401

Microprocessor design and technology
Common chip for disk and diskette controllers — Dix 440
VLSI chip design — Mathews 464
VLSI considerations — Campbell 454
16-bit microprocessor physical design — Correale 446

Microprocessor systems
Implementation of mainframe processors — Agnew 401

Models and modeling
Multi-parametric approach to process optimization — Bergendahl 580
Simulating queue networks — Shedler 625
Suspend lock performance — Hofmann 242
Yield management — Stapper 532
3081 design verification system — Monachino 89

Pattern recognition
Cursive script recognition — Tappert 765
Document analysis system — Wong 647
Image segmentation algorithm — Danielsson 698
Rescaling print fonts — Casey 657
Separating patterns by ellipsoids — Barnes 759

Performance analysis
Simulating queue networks — Shedler 625
Suspend lock performance — Hofmann 242

Physics and physical chemistry
Laser-enhanced plating and etching — von Gutfeld 136

Plant automation
Structured distributed system — Mescia 497

Polymers
Photochemical hole burning in organic glasses and polymers — Gutiérrez 198

Printed-circuit board fabrications
High-density fabrication — Bupp 306

Printed-circuit board design
Advanced printed circuit — Bonner 297

Processor controller design
3081 processor controller — Reilly 22

Programming and programming languages
Signal processor software support — Davies 431

Programming systems development
Signal processor software support — Davies 431

Real-time processors
Signal processor — Mintzer 413

Reliability
Indium-lead alloys for chip connections — Howard 372
Single chip module — Bendz 278
3081 automated diagnostic methodology — Tendolkar 78

Semiconductor technology
Chlorobenzene single-step liftoff — Collins 596
Czochralski-grown silicon — Murgai 546
Laser modification of device characteristics — Kiang 171
Mechanism of chlorobenzene liftoff — Halverson 590
Plasma processing for Si gate FET devices — Bergendahl 580

Signal processing
Microprocessor for signal processing — Mintzer 413

Signal processing transforms
Rectangular transforms — Cooley 424

Signal processor program support
Software support — Davies 431

Simulation
VLSI design verification strategy — Tran 475
VLSI physical design verification — McCabe 485
3081 design verification system — Monachino 89

Solid state physics
Image projection with nonlinear optics — Levenson 160
Laser modification of semiconductor device characteristics — Kiang 171

Statistics
Simulating queue networks — Shedler 625

Structured distributed system
Plant automation system — Mescia 497

System architecture and development
Microprocessor for signal processing — Mintzer 413
Microprocessor implementation of mainframe processors — Agnew 401
3081 processor controller — Reilly 22
3081 processor unit design — Gustafson 12
